

Guaranteed “Grub free” for 3 months from the date of delivery

- Sir Walter
- Tall Fescue

Anco’s Sir Walter or Tall Fescue is treated with **Acelepryn** and is “guaranteed” grub and bug free turf.

This product is the latest innovation in the control of grubs in your lawn. Traditionally, to treat for grubs in your lawn you would have to spray several potentially toxic chemicals on the leaf of the plant.

Acelepryn® however is a non toxic insect killer, which when sprayed onto the leaves is absorbed and moves upwards within the plant, where it is then digested by the grub, disrupts its feeding patterns, and eventually causes it to starve. **Acelepryn**® is NOT a poison and is safe for your whole family & your pets.

We believe so much in **Acelepryn**® we will guarantee that if you find turf damage caused by grubs within three months of delivery of your turf we will re-spray with **Acelepryn**®.

- ✓ Kid Friendly
- ✓ Environmentally Friendly
- ✓ Non Toxic
