

Lawn Solutions Grub Guard Ultimate

Lawn Solutions Grub Guard Ultimate Turf Insecticide delivers excellent preventative control against a large range of common lawn pests. Optimal results are achieved when applied early in the season at the appearance of overwintering adult pests.

The long residual performance of Lawn Solutions Grub Guard Ultimate Turf Insecticide will provide up to 6 months of protection at the higher application rates. Curative control of pest outbreaks later in the season can also be achieved using the higher recommended application rates.

Controls

Lawn Armyworm, Lawn Curl Grub (African Black Beetle Larvae), Argentine Stem Weevil, Billbug Larvae, Sod Webworm

Sizes Packaging (not minimum amount)

4kg Bucket Singularly

Pack/s approximate area of coverage

500m²

Application

Lawn Solutions Grub Guard Ultimate Turf Insecticide is a ready-to-use spreadable insecticide granule. Measure the lawn area before application to determine size then weight amount of granules to apply over the area. Evenly spread granules over the lawn either by spreader or hand application.

Spreader application: The use of a garden spreader or professional spreader that can be calibrated for even output is recommended for optimal product performance. Use a drop type, rotary type or handheld spreader.

DO NOT apply when the soil is saturated with water as adequate distribution of the product into the soil will not be achieved.

Rate:

75 – 150g per 10m² or 750g – 1.5kg per 100m²

Apply the higher rate for:

- up to 6 months residual protection
- cases of high pest pressure
- late in season when mature grubs are present for African Black Beetle (typically mid-December onwards)

Lightly water in immediately after application.

Precautions

Whenever you are using chemicals such as Grub Guard Ultimate, it is always important that you follow the safety directions provided on the product and wear the recommended protective clothing.
